Summary

I am a cloud and DevOps engineer with around 2 years of experience across OCI and Azure infrastructure, CI/CD pipelines, and Python automation. I have hands-on experience with Terraform, Docker, Jenkins, and IAM, and hold multiple cloud certifications covering infrastructure, security, and cost optimization.

Experience

Cloud4C, OCI Engineer

July 2026 – present

- Earned Oracle Cloud Infrastructure 2025 Certified Foundations Associate and Certified Architect Associate certifications, demonstrating advanced foundational and architectural knowledge of OCI cloud services, infrastructure design, and enterprise deployment patterns
- Designed and managed scalable OCI cloud infrastructure across Virtual Machines, Boot & Block volumes, Oracle Base Database, Load Balancer, and IAM services; implemented security policies, compartment structures, audit logging, and cost analysis frameworks for enterprise operations
- Developed Python automation scripts leveraging OCI Python SDK to streamline cloud operations, generate Cloud Guard security reports, maintain OCI resource inventory, produce VM status reports, and execute bulk VM start operations at scale

Cloud4C, Azure Engineer

July 2024 – Jan 2026

- Earned Microsoft Azure Fundamentals (AZ-900) certification, demonstrating foundational knowledge of Azure cloud services, infrastructure concepts, and deployment principles relevant to DevOps engineering
- Deployed and managed core Azure infrastructure services including Virtual Machines, Virtual Networks, Load Balancer, NAT Gateway, Azure Bastion, VM Snapshots, and Azure Database for MySQL Flexible Server
- Supported Azure infrastructure operations through resource monitoring, configuration management, troubleshooting, and maintenance activities to ensure system reliability and operational continuity
- Prepared quarterly Azure cost optimization reports analyzing resource utilization patterns and identifying cost reduction opportunities to improve infrastructure efficiency and financial planning outcomes

Cloud4C, Associate Engineer

Aug 2024 – Jan 2026

- Managed incident lifecycle and ticket routing across Alpha Dashboard ticketing system, ServiceNow for incident and service request management, and Jira for technical issue tracking and team coordination
- Coordinated operational tasks and team communication using ServiceNow dashboards on DHL project and Slack-Jira integration for real-time incident management and cross-functional collaboration on WIO Bank project

Maybank, Internship

Nov 2023 – June 2024

- Designed and executed JUnit test cases to validate Java applications, ensuring code reliability and reducing defects before production deployment across multiple modules
- Wrote and optimised SQL queries to generate static documentation webpages, improving data retrieval efficiency and supporting automated documentation workflows for development teams
- Analysed and resolved code quality issues, security vulnerabilities, and hotspots identified through SonarQube, implementing fixes to strengthen application security posture and compliance

Education

Reva University, B.Tech in Computer Science & Engineering in Computer Science

Aug 2020 – Aug 2024

Projects

Java 3 Tier Application

- Designed and deployed a Java 3-tier web application with automated CI/CD pipeline using GitHub, Jenkins, and Maven, integrating SonarQube for code quality analysis and Nexus for artifact management.
- Containerized application using Docker and provisioned Azure cloud infrastructure (networking, compute, security, database) with Terraform Infrastructure as Code for scalable, automated deployment.
- Implemented end-to-end DevOps workflow spanning source-code management, CI/CD automation, build packaging, code quality analysis, artifact management, Docker image creation, and cloud infrastructure provisioning.
- **Technologies:** Azure, CI/CD, DevOps, Docker, GitHub, Infrastructure as Code, Java, Jenkins, Maven, Nexus, SonarQube, Terraform

Certifications

Oracle Cloud Infrastructure 2025 Certified Foundations Associate

Aug 2026

- Earned Oracle Cloud Infrastructure 2025 Certified Foundations Associate credential, validating core competency in OCI cloud services, infrastructure deployment, and foundational cloud architecture principles.

Oracle Cloud Infrastructure Certified Architect Associate

Aug 2026

- Earned Oracle Cloud Infrastructure Certified Architect Associate credential, validating expertise in designing, deploying, and managing scalable cloud solutions on OCI platform with proficiency in core services, networking, and security.

Microsoft Azure Fundamentals (AZ-900)

Aug 2026

- Earned Microsoft Azure Fundamentals (AZ-900) certification demonstrating proficiency in cloud concepts, Azure services, security, compliance, and cost management aligned with industry standards.

Skills

Skills: DevOps, AWS, CI/CD, Docker, Terraform, Jenkins, Ansible, Infrastructure as Code, Python, Bash Scripting

Languages

Languages: English (Fluent)
