 @Vignesh Venkatachalam

 Vignesh

SKILLS

- ❖ OCI, Azure
- ❖ Jenkins, Git & GitHub, Docker, Maven, SonarQube, Nexus, Gen AI
- ❖ Python, Terraform, Java
- ❖ Linux, Bash Scripting, Ansible

EDUCATION

- ❖ Reva University | College CGPA: 8.6 | 2024
- ❖ XII (CBSE) | School 89.0% | 2020

EXPERIENCE

- ❖ **Internship | Maybank** 11/2023–06/2024
 - Wrote and executed – **Junit** Test cases to validate the Existing Java application.
 - Wrote and executed – **SQL** queries that were used to generate static documentation webpages.
 - Analyzed and worked on code quality issues, bugs, Vulnerability & security hotspots identified through **SonarQube**.
- ❖ **Associate Engineer | Cloud4C** 08/2024–01/2026
 - Started my professional career as an **Associate Engineer**, initially working with the **Alpha Dashboard ticketing platform** to monitor and route tickets to correct bin.
 - Later transitioned **DHL** project where I worked with the **ServiceNow dashboard** to manage incidents, service requests and operational tasks.
 - Later transitioned to the **WIO Bank project**, where I worked with **Jira and Slack** for incident tracking, task management, team communication and coordination of technical issues.
- ❖ **Azure Engineer | Cloud4C** 01/2026–07/2024
 - Earned the **Microsoft Azure Fundamentals (AZ-900)** certification, demonstrating foundational knowledge of Azure cloud services and concepts.
 - Worked with various **Azure services**, including **Virtual Machines, Load Balancer, VM Snapshots, NAT Gateway, Azure Database for MySQL Flexible Server, Azure File Shares, Azure Bastion, Virtual Networks (VNETs) and Subnets**.
 - Supported Azure infrastructure operations, including resource monitoring, configuration, troubleshooting and maintenance activities.
 - Prepared **quarterly Azure cost optimization reports** to analyze resource utilization and identify opportunities for cost optimization.

- Earned the **Oracle Cloud Infrastructure 2025 Certified Foundations Associate** certification, demonstrating foundational knowledge of OCI cloud services and concepts.
- Working with various **OCI services**, including **Virtual Machines, Boot & Block volumes, Oracle Base Database, IAM, Audit logs, Cost Analysis, Load balancer, Scheduler, Backups, IAM policies, Compartment, Alert suppression**
- Earned the **Oracle Cloud Infrastructure Certified Architect Associate** certification
- Developed **Python automation scripts using the OCI Python SDK** to streamline cloud operations and generate reports, including **Cloud Guard security reports, OCI resource inventory, VM status reports and bulk VM start operations**.

ACADEMIC PROJECTS

❖ **Java 3 tier Application**

Developed and deployed a Java-based 3-tier web application with separate application and database layers, implementing an end-to-end DevOps workflow for automated build, code quality analysis, artifact management, containerization and cloud infrastructure provisioning. The project integrates GitHub, Jenkins, Maven, SonarQube, Nexus, Docker and Terraform, with Azure infrastructure provisioned using Infrastructure as Code. The application was containerized using Docker, while Terraform was used to provision the required Azure networking, compute, security and database resources. The project demonstrates a complete DevOps lifecycle from source-code management → CI/CD → build and packaging → code-quality analysis → artifact management → Docker image creation → cloud infrastructure provisioning → application deployment.

Please find the GitHub link: [Java-3-tier-Application](#)

ACHIEVEMENTS / HOBBIES

❖ **Table Tennis & Badminton player**
